DETAILED ACTION

Response to Arguments

Applicant's cancellation of claims 11-20 & 32 is noted. Also Applicant's amendment of claims 4, 5, 7-9, 24, 25 & 27-29 is noted.

1. Applicant's arguments, see page 15, filed 6/4/2004, with respect to the counter ion concentration have been fully considered and are persuasive. The rejection of the claims as being anticipated by Takeuchi has been withdrawn. As such, the rejection of the claims as being obvious over Takeuchi in view of Schneider has also been overcome. With regard to Applicant's argument that the Takeuchi reference differs from the claimed invention in the amount of amino acids present in the sample (see Applicant remarks, pages 14-15), it should be noted that this was an unclaimed feature and had no effect on the Examiner's determination that Takeuchi was no longer applicable.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 & 31 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: any steps that serve to further define what Applicant intends as the "computerized" method. The claims as currently drafted do not set forth any actual computerized steps, but for "displaying said analysis for said user." This limitation is

Art Unit: 1743

not sufficient to support an assertion of a "computerized" method. It is suggested that the claim be modified to include actual computerized analysis steps or the term "computerized" should be removed from the instant claims. To further exemplify the Examiner's stance towards these claims, Applicant should take note of the minimal differences between the instantly rejected claims 1-3 and claims 21-23 that do not recite a computerized method. An example of a suggested amendment may be: "*A computerized method for separating an analyzing plurality of amino acids. . . when β -aminoisobutyric acid (β -AiBA) is eluted; separating said plurality of amino acids; detecting each of said plurality of amino acids in a detector; and displaying the results of said separation and analysis.*" Further correction is required.

Double Patenting

4. Claim 31 objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Allowable Subject Matter

5. Claims 21-30 & 33 are allowed.
